Home Department -Hyderabad City Police –Establishment of City Wide CCTV Surveillance System covering Hyderabad and Cyberabad Police Commissionerates – Constitution of High Powered Committee and Project Management Unit (PMU) – Orders – Issued.

HOME (LEGAL) DEPARTMENT

G.O.MS.No. 64

Date: 27.12.2014

From the Commissioner of Police, Hyderabad City
Lr.RC.No.L&O/A5/1082/2014, Dt:03.12.2014.

ORDER:

In the reference read above, the Commissioner of Police, Hyderabad has stated that the newly carved out State of Telangana has high cultural values and historical heritage that provides an opportunity for integration into the world economy which has proven to be a powerful means for the State to promote economic growth, development, poverty reduction and enhance safety and security of every citizen. The global communities have realized a tremendous opportunity and potential for long term investments to expand the foot prints at the capital city of Hyderabad on the global map. One of the objectives of the Government of Telangana is to enhance the safety and security of every Citizen who has an interest in contributing to the growth and development of the State.

2. Hyderabad City is a life line for the new State of Telangana. Emergence of Hyderabad as the Brand City for the new State of Telangana has necessitated the requirement to have City Wide CCTV Surveillance System supported by a modern State-of-art Command and Control Centre for ensuring fool proof safety and security of citizens in the Mega City.

3. Keeping this objective in view, the Government have proposed that the entire Mega City of Hyderabad covering Hyderabad and Cyberabad Police Commissionerates shall implement City Wide CCTV Surveillance System on par with International cities like London, New York etc., in a time bound manner.

4. The closed circuit television (CCTV) is an integrated Electronic Video Surveillance System which acts as a tool in tackling crime and violence in public places. It has proven to be a highly supportive tool in crime detection and most importantly acts as deterrence against crime due to "certainty of offenders being caught and punished". It also acts as aid to police investigations, traffic management by streamlining the traffic and reducing the traffic jams, monitoring the public events, crowd management, and in general, improving the sense of safety and security among the citizens.

5. This system would ensure that every inch of the city which houses several vital installations will be mapped round-the-clock through these surveillance cameras.

(P.T.O)

6. It also helps various other Government Departments and Agencies in effective discharge of their functions such as monitoring road conditions, garbage and wastage management, pipe line leakages etc., through their own Command Centres where all or selective video feeds from field cameras are streamed based on the need. Thus, this City Wide Video Surveillance System (CCTV) will also help achieving the Smart City objectives apart from Safe City.

7. In order to implement the provisions of the Public Safety (Measures) Enforcement Act, 2013 in its true spirit and to ensure the effective electronic surveillance of every nook and corner of the city, the Government proposed to constitute the High Powered Committee and Project Management Unit (PMU) for establishing a well-connected CCTV Surveillance Network with a state of the art monitoring at Central Command Control Centre with latest Video Analytics.
